

Guidance for Our Members & Volunteers

Our volunteers, marshals, and members are central to everything we do. Without your commitment, our events simply could not happen. Just as you help keep competitors and spectators safe, you also play a vital role in helping us run our sport more sustainably.

As the people who make our events possible, you play a vital role in helping us reduce our environmental impact and engage with the wider community.

What we ask

We ask everyone to help reduce paper waste by using online documentation. If you print information, please use FSC certified or recycled paper. If you receive printed paperwork, please recycle responsibly.

We ask you to share lifts where possible - after all, it's more sociable that way. When you're at an event, please make sure you take your litter home.

When you're engaging with members of the wider community, we ask that you treat everyone with the same respect.

What we do

We provide clear information and reminders on sustainability in event briefings, signage, and documentation. Recycling bins and spill kits are available at key locations, and we work with East Riding Council, landowners, and Carbon Positive Motorsport to make sure our events run to high environmental standards. Our committee reviews sustainability at every event, and we listen to all of you, so that lessons learned can be built into our events going forward.

What it means for you

Your actions make a real difference. By following this guidance and setting an example to competitors and spectators, you help ensure our events leave a lighter footprint and a positive impression. Together, we can protect the environment, our communities, and the future of rallying.

**Every action counts, from recycling to lift sharing.
Together we can protect the future of rallying.**
