

### **Guidance for Our Suppliers & Partners**

Our suppliers and partners play a vital role in helping us reduce the environmental impact of our events. By working together, we can deliver safe, professional, and enjoyable rallies while supporting sustainability at every stage.

**With help from our partners and suppliers, we can reduce waste and take practical steps that show sustainable motorsport is achievable.**

### **What we ask**

We encourage all our suppliers and partners to help us by keeping packaging to a minimum, avoiding single-use plastics, and choosing recyclable, reusable, or biodegradable materials where possible. Sourcing locally, when it's practical, helps reduce transport distances, and promoting responsible recycling to your own customers extends good practice beyond the rally itself. These small steps add up to make a meaningful difference.

### **What we do**

As organisers, we lead by example by reusing rally signage year after year, choosing recyclable inks and materials, and encouraging our catering partners to minimise single-use plastics. We also prioritise working with local businesses wherever possible to cut transport emissions and to keep investment within the community.

### **What it means for you**

By joining us in these efforts, you'll not only be helping us meet our environmental goals, but also showing your own commitment to sustainability. Working in this way builds stronger partnerships, reduces unnecessary costs, and demonstrates to competitors, spectators, and the wider community that motorsport suppliers and organisers can lead by example.

**Our suppliers and partners are helping us to reduce waste and to find local, sustainable options. Together we are working to reduce our environmental impact.**
